Place this chromosome in the partially completed karyotype below by clicking on its homologous chromosome. If you match the chromosome correctly, you will proceed to the next chromosome.

Karyotyping Activity - The Biology Project

Subdisciplines of Biology The field of biology is very broad in scope and can be divided into several disciplines. In the most general sense, these disciplines are categorized based on the type of organism studied. For example, zoology deals with animal studies, botany deals with plant studies, and microbiology is the study of microorganisms.

Biology — Characteristics of Life and Principles

You will electronically complete the karyotype for three individuals and look for abnormalities that could explain the phenotype. Your assignment This exercise is designed as an introduction to genetic studies on humans. Karyotyping is one of many techniques that allow us to look for several thousand possible genetic diseases in humans ...

Karyotyping Activity - The Biology Project

Complete Patient A's Karyotype. Patient B Patient B is a 28 year old male who is trying to identify a cause for his infertility. Chromosomes were obtained from nucleated cells in the patient's blood. Complete Patient B's Karyotype. Patient C Patient C died shortly after birth, with a multitude of anomalies, including polydactyly and a cleft lip.
