Motion is the action or process of a physical body being moved. There is a way in which one can calculate speed and we covered it in class as we tried to understand the laws of motion and how to calculate how far or fast an object may move. Do you believe you fully understood chapter 10 section one on measuring motion? Test your understanding by taking the review quiz below.

## **Chapter 10 Quiz - Motion (Holt) - ProProfs Quiz**

History of the development of the reciprocal lattice is reviewed. The reciprocal lattice as an essential tool for the study of diffraction experiments by ordered structures and characterization of their structural properties is widely taught in any text of solid state or chemistry, but usually without discussion of its history.
