Manual of Fisheries Survey Methods II January 2000 Chapter 6 1 Chapter 6: Sample Size for Biological Studies Roger N. Lockwood and Daniel B. Hayes The goals of this chapter are to provide fisheries personnel with a better understanding of sampling issues related to data collection and to present methods for determining appropriate sample sizes.

## **Manual of Fisheries Survey Methods II: with periodic updates**

Capture fisheries (a) Different methods involved in capture fisheries. (b) Materials required for capture fisheries and their uses. Various methods of capture fisheries such as hook and line, cast netting, set netting, trap/trapping, trawling, harpooning should be assessed. Assessment should include hooks, cages,

## **FISHERIES (ALTERNATIVE B)\*\* (For candidates in Nigeria only)**

The diagnostic methods presented in this Aquatic Manual are all direct diagnostic methods. Due to the insufficient development of serological methodology, the detection of antibodies to pathogens in fish has not thus far been accepted as a routine method for assessing the health status of fish populations.

## **Manual of Diagnostic Tests for Aquatic Animals**

A further aim of the manual is to serve as a resource in formal training activities carried out by the SPC fisheries programme as well as national fisheries development agencies and extension officers. The manual is intended for use as a training aid to help introduce and explain fishing topics to small- and medium-scale fishermen and others.

Manual on anchored fish aggregating devices (FADs): An update on FAD gear technology, designs and deployment methods for the Pacific Island region Preface. This manual updates the SPC 2005

FAD manual (Chapman et al. 2005) by drawing on experience and lessons learned by FAD practitioners across the Pacific over the past decade.

### **Manual on anchored fish aggregating devices**

The manual is not only intended for the training of extension officers, but is also resource material to be used in the field when interacting with farmers. Acknowledgements are due to Dr Niall Vine for developing the first draft of the manual and to Mr Nicholas James for further development and testing the manual in the field.

### **A Manual for Rural Freshwater Aquaculture**

Manual of Fisheries Survey Methods II January 2000 Chapter 23 1 Chapter 23: Guidelines for Evaluating Walleye and Muskie Recruitment William Ziegler and James C. Schneider Biologists in Wisconsin have refined catch-per-effort (CPE) methods for surveying and evaluating the recruitment of juvenile walleye and muskellunge over many years.

### **Manual of Fisheries Survey Methods II: with periodic updates**

2 Fishing Methods and Gear Traditional fishing arts have been developed over the years to adapt to local conditions (such as the type of coast and nearshore area), the species of fish desired, and the size targeted. The most successful fishing methods of a given region are those that have stood the test of time.
