### Pearson mylab statistics answers

Two widely used test statistics are the t-statistic and the F-test. Example. Suppose the task is to test whether a coin is fair (i.e. has equal probabilities of producing a head or a tail). If the coin is flipped 100 times and the results are recorded, the raw data can be represented as a sequence of 100 heads and tails.

### Test statistic - Wikipedia

Even though the no-effect null hypothesis yields less information, it's used because it's easier to test using statistics. Basically, testing whether something is unchanged/changed is easier than trying to quantify the nature of the change. ... Weiss, Neil A. (1999). Introductory Statistics (5th ed.). ISBN 9780201598773.
