The secant ogive on Scirocco bullets requires some experimenting to find the correct distance from contacting rifling for the bullets to shoot accurately. The Swift Bullet Company Reloading Manual Number Two states: "The fact remains that when it comes to producing a tight-grouping load, in a particular firearm, there is no way to predetermine the component combination and bullet seating depth that will do it best. You just have to shoot it to find out."

In 2012, Swift will introduce its new "Lever Action Series." These new bullets are a re-configured A-Frame design. This new design allows the bullet to open up at very low velocities (1200 fps), which is critical in these slow moving cartridges. On the high end of the velocity scale the bullet functions well up to approximately 2700 fps.
